2022-05

Tronex hand tools were evaluated in a ISO Class 6/Class 1000 cleanroom environment over a 2-week period.

Two hard-wire cutters were evaluated under the following process. The cutters are wiped and cleaned with 70% IPA before use in the ISO Class 6/Class 1000 cleanroom environment.

Both hard-wire cutters remained in good condition. There was no corrosion, no discoloration and the handle did not dry out over time.

We recommend all Tronex hand tools be trialed and evaluated within your cleanroom application.

Thank you,
